

Dear Year 2 (soon to be Year 3!),

We have heard ALL about your amazing learning attitudes and we really can not wait to meet you in person at Shirley Juniors and see them at work.

To get you prepared for the skills we use at SJS we have put together a 'Learning Value Challenge Grid' for you to have a go at whilst you are at home. You can choose the challenges you would like to work through over the next few weeks or even do some of them over the holidays to help you in getting ready for Year 3!

Meet our Learning Values on our transition page <https://www.shirleyjuniorschool.org/page/?title=Welcome+Year+3+2020+%2D+2021&pid=174> —next to each value you will find an explanation of what the value means. We are very excited to be seeing Grit alongside our values next year—you will be starting alongside it in September!

Each square has a different challenge linked to a learning value and when you complete it you can put it in a folder to bring in and share in September or send it for your teachers to see to [teachers@shirleyschools.co.uk](mailto:teachers@shirleyschools.co.uk). If you title your email Year 3 Transition challenge we will make sure the your teachers get to see your fantastic work.

Looking forward to seeing you and your amazing work soon,

Shirley Junior School :)

# SJS Learning Value Challenge

## Year 3 transition home learning

Over the last weeks of Summer 2, and into the Summer holidays, we are challenging the Year 2 children coming to SJS to begin to develop some Shirley Junior learning values. Children can use this opportunity to explore the learning values and think about how they might use them when learning in school.

### **1.Reflection**

Think about your favourite memories from Year 2 and create a page or even a scrapbook that shows them. What did you love? What skills have you got better at?

### **2.Curiosity and Imagination**

Outdoor art—use items from the outdoors to create a piece of artwork that says Year 3. Challenge: Could you make the red curiosity learning value picture too?

### **3.Co-operation**

What job could you do that may help out around the house? Work alongside your family to help out with the running of the house— what new skill will you learn along the way?

### **4.Independence and Aspiration**

Introduce yourself, including what makes you special in a letter, video or PowerPoint to share with your teacher.

### **5.Citizenship**

Explore different recipes and cook a meal or treat for someone else to enjoy. Take a photo of you cooking/people enjoying your food to share with your class.

### **6.Grit**

Begin to develop your growth mindset. Use the proforma below to think carefully about yourself. How will you tackle those things that sometimes you are afraid of trying?

### **7.Problem Solving**

The house captains have set lots of taskmaster challenges this half term to get children problem solving. Have a go at the SJS scavenger hunt— task 2. Your year 3 teachers will love to see your final pictures.

(Don't worry about the due date in the video—your entries can count towards next years house points!)

<https://www.youtube.com/watch?v=ORuXg444sEA>

### **SJS Learning Values**

Create a poster to show all of the SJS learning values and show what each one means.

# It's All About the Mindset

Something I have to really work at is...

Something that comes pretty easy for me is...

**This is Me!**

Something I wish I could do better is...

Something I'm not afraid of trying is...
